MONETARY BULLETIN

(MARCH 2011)

The section *Monetary Overview* of the "*CBA Bulletin"* monthly of the Central Bank of Armenia contains the CBA April 12, 2011 Board Meeting's Minutes on the refinancing rate for April 2011, and information on monetary, external, fiscal and real sectors, and data on payment and settlement system and the main financial system ratios.

The source of information on *Real Sector* (excluding core inflation) and on goods' export and in *External Sector* is the National Statistics Service of Armenia (http://www.armstat.am). The source of information on fiscal, external sectors, monetary and financial statistics, core inflation and payment and settlement system is the Central Bank of Armenia. The monetary and financial statistics includes information on monetary indicators and the main financial market and financial system ratios.

Monetary indicators are based on the CBA's "*Monetary and Financial Statistics of the Republic of Armenia Manual*" which is available on the CBA website in the section *Statistics*.

The monetary indicators and international reserves of the Republic of Armenia are subject to adjustment per quarter and per annum in order for the closing entries of the CBA operations to be included in these indicators. The quarterly data and the annual data shall be adjusted (treated as final) two months after the end of the reporting quarter and three months after the end of the reporting year, respectively.

The timetable for publication of statistical data is available on the CBA website in the section *Statistics.*

BOARD OF CBA

MINUTES
(12.04.2011)

Refinancing Rate for April of 2011

The 12th of April 2011 CBA Board Meeting attended by Chairman A. Javadyan, Deputy Chairman N. Yeritsyan, and Board Members A. Darbinyan, A. Norekyan, A. Chilingaryan, A. Mkrtchyan and V. Abrahamyan

The Board Meeting started with presentation of the Situation Report. The discussion covered current developments on inflation, external environment and real, fiscal and monetary sectors. The 12-month inflation for March of 2011 (calculated using new weights of the consumer basket) was 11.5 percent, which, as the Board considers, is quite high. Prices of food products surged, too, making 8.3 pp contribution to the 12-month inflation for March.

According to official statistics, in March of 2011, relative to the previous month, inflation was 0.8 percent. Inflation recorded in March was largely due to 0.4 pp price increase in food products, determined by price increases in items “vegetable and potato” (0.2 pp) and “bread” (0.1 pp). The rise in prices of non-food products and tariffs made, respectively, 0.1 pp and 0.3 pp contribution to the monthly inflation. Price rise in services was determined by increased service tariffs for medical services, transport and leisure.

The economic activity indicator, which represents output growth of the sectors of the economy relative to the same period of the previous year, was 1.4 percent at the end of February. This was a result of reported growth of output in all sectors of the economy except for Construction. Industry reported 2.6 percent growth owing to added production volumes in *metal ore, food, beverage, metallurgy* and *metal manufacture,* primarily driven by recovering global economy. Output in construction has shrunk by 4.1 percent. Yet, increased volumes of construction financed by private organizations and humanitarian aid have mitigated to some extent reduced volumes of construction to the expense of state budget, local budgets, international loans and household funds. The reported growth in Services has been mainly a result of increased volumes in *wholesale trade, financial and insurance activities,* and *transport.* Output volumes in Agriculture remained almost the same: the reported decrease in egg production has been offset by increased production volumes in slaughtered animal and poultry.

In the period January-February 2011, relative to the same period of the previous year, the export of goods (FOB) has grown by 27.6 percent y-o-y. In the meantime, the growth rate in import of goods (CIF) has been 3.1 percent.

The Board referred to the financial market developments for the first quarter of 2011. In interbank and intrabank repo markets, the average interest rate has risen by 0.54 pp relative to the previous month and reached 7.6 percent, as a result of gradually tightened monetary conditions during the quarter. Despite this, in the face of existing liquidity, interest rates in primary market of government securities tended to fall against the previous quarter. So, average interest rate of treasury bills with up to 1 year of maturity dropped by 1.21 pp to 7.9 percent and average interest rate of medium-term notes, by 0.68 pp to 13.7 percent.

In the first quarter of 2011, relative to the previous quarter, the average exchange rate of AMD versus USD depreciated by 1.48 percent to AMD 366.14; furthermore, the AMD exchange rate depreciation versus EUR was 2.1 percent, to AMD 500.96, and versus RUR, was 6.25 percent, to AMD 12.53.

Notwithstanding gradual increase of the Refinancing Rate, sustainable growth in lending continued: over the course of the last 12 months it reached 29 percent. Foreign currency loans prevailed in total lending where about AMD 44 billion of loans, out of AMD 55 billion provided during the first quarter, were in foreign currency. Such a development in lending was considered worrisome by the Board as that may generate inflation risks through the growth of aggregate demand in the future.

During the quarter, in the face of extensive foreign currency lending, dram deposits have grown by a mere 0.7 percent whereas FX deposits by 7.3 percent (6 percent when the impact of the change in exchange rate is excluded). This pushed the dram broad money down by 4.7 percent but drove the broad money up by 0.5 percent. However, the 12-month developments with aggregates, reflecting the outcome of the de-dollarization measures, point out that the dram broad money has grown faster, by 22.8 percent, over the 11.9 percent growth of the broad money; the 12-month growth of dram deposits and foreign currency deposits amounted to 40.4 percent and 1.2 percent, respectively (8.5 percent when the impact of the change in exchange rate is excluded). So, based on the 12-month results, the level of dollarization subsided by 9.6 percent.

Following presentation of the Situation Report, the Board began discussing the developments in external and domestic environments as well as the monetary policy directions.

In the first quarter of 2011, world food markets saw material price volatilities associated with uncertainties driven by geopolitical developments in some oil extracting countries and the Japan disaster. In the mid of the quarter, prices of almost all primary goods and food products posted new two-year peaks, followed by downside adjustments at the end of the quarter. The Board acknowledged that though price growth rates in world food markets started to slow down, any escalation of the price level against the first quarter projections would add to external inflation pressures on the domestic economy and thus generate second-round inflationary effects and inflation expectations for the upcoming period of time.

Impulses coming from the domestic economy are predominantly non-inflationary. There are weak inflationary pressures deriving from the labor market. The impact of private spending is mostly neutral yet risks involved are associated with the rapid growth of lending and transfers. The measures in Agriculture will help to bring the reduced supply (based on the 2010 results) back on track over the first couple of months of the year, if whether conditions prove favorable. The aforementioned developments, combined with the tightened monetary conditions, restrictive fiscal policy impact on the creation of aggregate demand, as well as continued anti-crisis measures in cooperation with other state authorities will create real preconditions to bring inflation back to the target, starting from the second half of 2011.

In consideration of the environment whereby second-round inflationary effects and inflation expectations generate risks for the upcoming period of time, the Board, pursuing to neutralize such negativity, decided to tighten the monetary conditions further but on somewhat softer terms, though. Following the lift of Refinancing Rate by 0.5 pp for the previous two months each, the Board raised it by another 0.25 pp for April while making more active use of the tools to handle liquidity.

In the April 12, 2011 meeting the Board set the Refinancing Rate at the 8.5 percent level; the Lombard Repo Rate and Deposit Facility Rate were set at 11.5 percent and 5.5 percent, respectively.

[1] *Monetary aggregates are netted from seasonality.*
The time series of monetary aggregates are annually revised since seasonal coefficients for relevant months change along with the new data. Thus, seasonally adjusted new monetary aggregate series are published in the first issue of each year of the monthly "CBA Bulletin".
The time series adjustment has been carried out using Census X-12-ARIMA method of adjustment.
