MONETARY BULLETIN

(JUNE 2011)

The section *Monetary Overview* of the "*CBA Bulletin"* monthly of the Central Bank of Armenia contains the CBA July 12, 2011 Board Meeting's Minutes on the refinancing rate for July 2011, and information on monetary, external, fiscal and real sectors, and data on payment and settlement system and the main financial system ratios.

The source of information on *Real Sector* (excluding core inflation) and on goods' export and in *External Sector* is the National Statistics Service of Armenia (http://www.armstat.am). The source of information on fiscal, external sectors, monetary and financial statistics, core inflation and payment and settlement system is the Central Bank of Armenia. The monetary and financial statistics includes information on monetary indicators and the main financial market and financial system ratios.

Monetary indicators are based on the CBA's "*Monetary and Financial Statistics of the Republic of Armenia Manual*" which is available on the CBA website in the section *Statistics*.

The monetary indicators and international reserves of the Republic of Armenia are subject to adjustment per quarter and per annum in order for the closing entries of the CBA operations to be included in these indicators. The quarterly data and the annual data shall be adjusted (treated as final) two months after the end of the reporting quarter and three months after the end of the reporting year, respectively.

The timetable for publication of statistical data is available on the CBA website in the section *Statistics.*

BOARD OF CBA

MINUTES
(12.07.2011)

Refinancing Rate for July of 2011

The 12th of July 2011 CBA Board Meeting attended by Deputy Chairman N. Yeritsyan, and Board Members A. Darbinyan, A. Norekyan, A. Chilingaryan, A. Mkrtchyan and V. Abrahamyan

The Board Meeting started with presentation of the Situation Report. The discussion covered current developments on inflation, external environment and real, fiscal and monetary sectors. The 12-month inflation in June of 2011 was 8.5 percent (projected indicator – 9.2 percent). Deflation in the second quarter reached 1.6 percent. Increase of price of food products made as much as 7.3 pp of contribution to the 12-month inflation and -1.7 percent of contribution to the quarter's deflation.

According to official statistics, in June of 2011, relative to the previous month, 1.4 percent deflation was recorded, and the 12-month inflation has fallen by 0.5 pp relative to the previous month's indicator. The month's deflation was totally due to 2.6 percent decrease in food prices driven by 25.6 percent fall in prices of item 'vegetable and potato'. The contribution of increased non-food prices and service tariffs to the month's inflation made up 0.05 pp.

The National Statistics Service of Armenia used a new methodology for calculation and publication of Q1 2011 GDP, which has grown by 1.2 percent relative to the same period of the previous year. No data on sectoral contributions to such a growth are available yet.

NSSA also published Economic Activity Index, 9.9 percent. In the period January-June, relative to the previous period, the EAI has been an estimated 5.1 percent due to increased output volumes recorded in industry and services, having amounted to 10.3 percent and 6.2 percent, respectively. The decline in construction was estimated to be around 3.5 percent in spite of increased volumes in construction & mounting works. There was a recorded 0.6 percent decline in agriculture explained by animal breeding indicators. Further, plant growing reported low growth. In consideration of the aforementioned, the second quarter's GDP indicator is within projection, according to the Central Bank estimates.

External trade turnover trended as follows: the growth of export volumes of goods again surpassed the growth of import volumes. Export (FOB) in the period January-May of 2011, relative to the same period of the previous year, has increased by 30.8 percent; import (CIF) has increased by 12.6 percent.

The Board referred to the labor market developments. Nominal wages have grown in some budget-supported organizations and in the private sector where growth of productivity in industry, services and construction, increased demand for labor and inflation of the previous period notably contributed to the growth of wages. According to

the Central Bank estimates, wage growth has been consistent with the productivity growth under current economic activity, so unit labor costs have not changed much. Therefore, in the context of generating an inflationary environment, developments in the labor market were neutral.

Driven by tightening of monetary conditions through refinancing rate, as well as other monetary policy instruments, average interest rate in interbank and intrabank repo markets rose by 1.79 pp against the previous quarter and amounted to 9.95 percent. Average market rate of treasury bills with up to 1-year of maturity rose by 1.47 pp and amounted to 9.37 percent and average market rate of medium-term notes rose by 0.16 pp and amounted to 13.85 percent, relative to the previous quarter.

In the second quarter of 2011, relative to the previous month, the average exchange rate of AMD versus USD depreciated by 2.15 percent to reach AMD 374.18; versus EUR it depreciated by 7.08 percent and made up AMD 539.15; and versus RUB it depreciated by 6.35 percent to reach AMD 12.38.

In spite of the financial sector's response to the monetary policy of the Central Bank, lending growth remained strong, topping more than 38 percent in the last 12-month period. Dram lending, unlike the previous months, has grown rapidly mostly due to the loans provided to agriculture. However, the volumes of foreign currency loans are still high enough: in the previous 12-month period dram lending has grown by 23.5 percent whereas foreign currency lending has increased by 50.3 percent (49.9 percent, if the impact of change in the exchange rate is excluded). Though foreign currency prevailed in assets transactions carried out by commercial banks, the de-dollarization keeps going in the liabilities side of the operations. As a result, a reported 48.8 percent increase of dram deposits and 18.2 percent increase of foreign currency deposits pushed the level of dollarization down by 4 percent.

Following presentation of the Situation Report, the Board began discussing the developments in external and domestic environments as well as the monetary policy directions.

In June of 2011, the IMF and World Bank released their regular reports on global economic prospects, predicting that expected world output growth rate in 2011 will reach 4.3 percent. For 2011, economic growth is forecast to be 2.2 percent in developed countries and 6.6 percent in developing countries. Economic growth has been revised downside for developed countries but upside for developing countries. As for inflation, it has been revised upside, 2.6 percent, for developed countries and left unchanged, 6.9 percent, for developing countries. In the meantime, both the IMF and World Bank talk about an increase of risks to the slowdown of world economic growth, associated with imbalances in financial and fiscal sectors, even more signs of overheating in developing economies and developments taking place in world commodity markets, even though risks deriving from it have reduced to some extent.

At the end-April of 2011, world commodities markets recorded considerable price volatility: following the rise in April, prices went down and stabilized in May-June, due to some slowdown on the world economic activity. Price stabilization trends were recorded for both raw materials and food products.

In the area monetary policy implemented by the world's major central banks, it should be noted that the European Central Bank tightened the monetary conditions by raising the policy rate by 0.25 pp, whereas the US Federal Reserve System preferred to maintain a moderate monetary environment by further implementing the QE2 policy. What is more,

there is much likelihood that the Fed would initiate the third phase of quantitative easing in the upcoming period. Due to the US economy developments, the three-month LIBOR has fallen and made up 0.26 percent in the third quarter

The Board stated that inflationary pressures coming from the external sector are not considerable. Despite certain volatilities reported in world commodities markets in the second quarter, prices remained relatively stable, and appearance of inflationary pressures in the upcoming months is estimated much less probable.

The Board has consensus in that developments in the domestic economy are not generating an inflationary environment either: the impact of the labor market and private spending is neutral and the fiscal policy's impact is restrictive. Further, the tightening of monetary conditions since the start of the year, under which the dram market responded to the 1.25 pp rise of the refinancing rate by an even higher interest rates rise, remains contributing to a moderate inflationary environment. More on that, a deflationary environment is expected to persist over the next two months due to price falls on agricultural products.

Current developments in world and domestic economies as well as more favorable conditions in agriculture allow the Board to re-affirm that inflation in the forecast time horizon will be in the range of 4%$\pm$1.5 given risks outlined in monetary policy program are balanced while they materialize. Under this situation, the Board considered approaches of leaving the refinancing rate unchanged or lowering the one.

In the July 12, 2011 meeting the Board decided to leave the Refinancing Rate unchanged, at the 8.5 percent level; the Lombard Repo Rate and Deposit Facility Rate were left 11.5 percent and 5.5 percent, respectively.

The Board will refer to the changing of the monetary policy direction at the end of July, in the context of the third quarter monetary policy program, once new possible risks will have been disclosed and reviewed in detail.

[1] Monetary base includes currency outside of the CBA, correspondent accounts of banks with the CBA (in drams and FX) and deposits of resident real sector (in drams and FX).

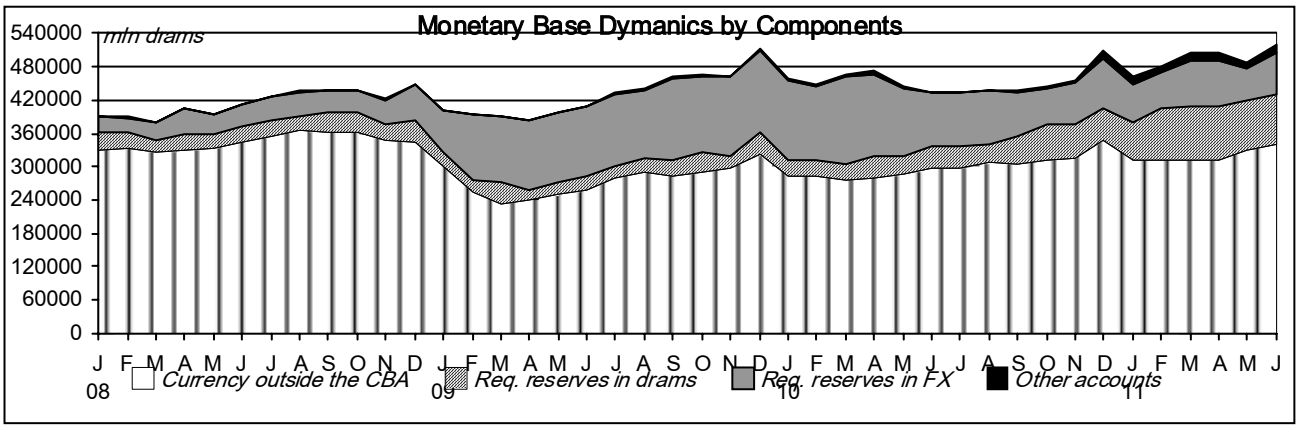

[2] M1 includes currency in circulation and residents' demand deposits (accounts including) and borrowings in drams.

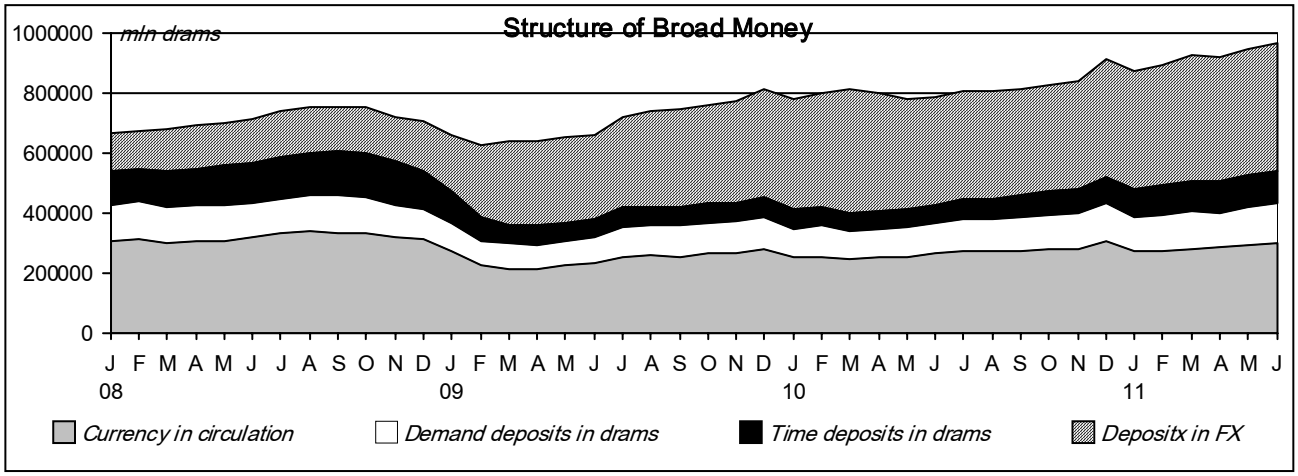

[3] M2 represents dram broad money and includes M1 and residents' term deposits and borrowings in drams.

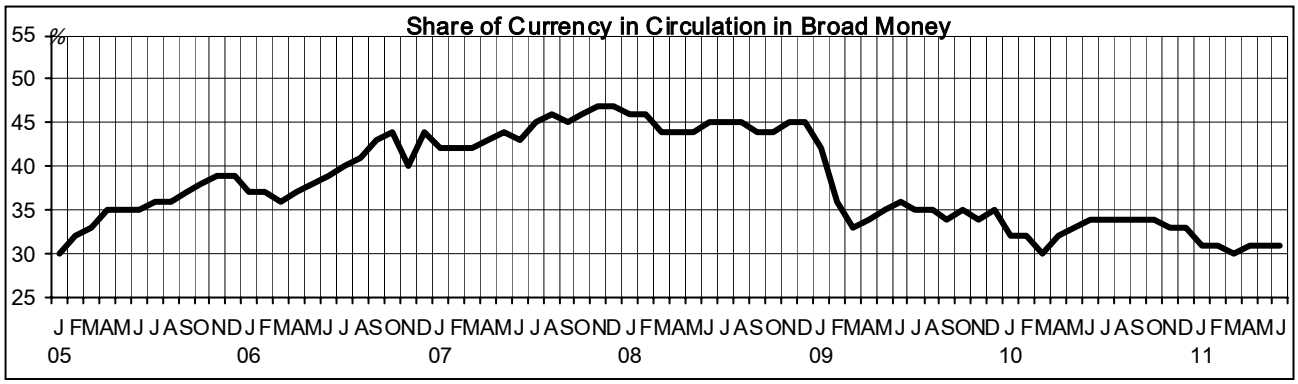

[4] M2X represents broad money and includes M2 and residents' FX deposits (accounts including) and borrowings.

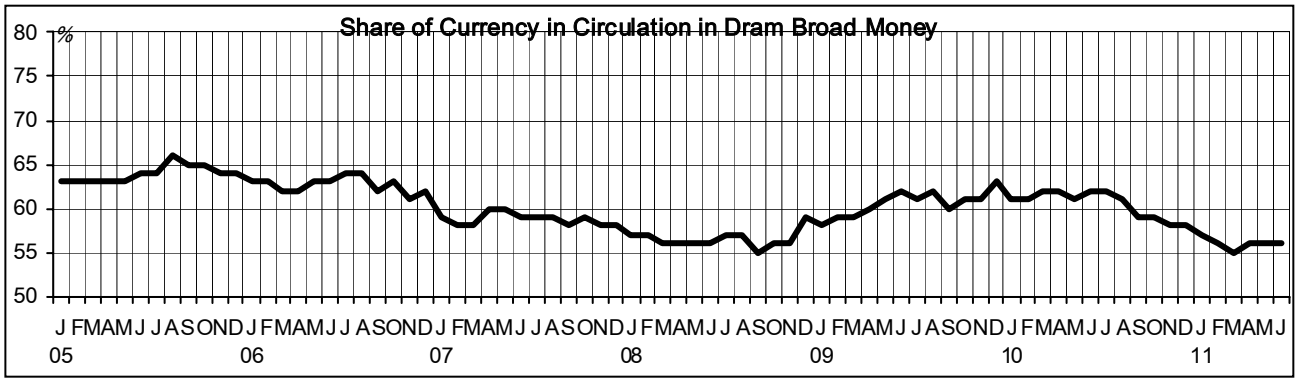

[5] Ratio of M2X to monetary base as of the end of the month.

[6] Ratio of M2 to the monetary base dram aggregates total as of the end of the month.

[1] *Monetary aggregates are netted from seasonality.*
The time series of monetary aggregates are annually revised since seasonal coefficients for relevant months change along with the new data. Thus, seasonally adjusted new monetary aggregate series are published in the first issue of each year of the monthly "CBA Bulletin".
The time series adjustment has been carried out using Census X-12-ARIMA method of adjustment.

[1] Including indicators of the CBA, commercial banks and credit organizations.

[2] NFA include only assets in convertible currency and foreign liabilities in convertible currency and Armenian drams. NIR of the CBA are calculated using program exchange rates (USD 1 = AMD 385, SDR 1 = USD 1.5403, EUR 1 = USD 1.4182, GBP 1 = USD 1.4511), NFA of commercial banks are calculated using actual exchange rates.

[3] Including currency in circulation, residents' demand and term deposits only in drams (accrued interest including).

[4] Including currency in circulation, residents' demand and term deposits in drams, FX deposits.[5] Ներառյալ հաշիվները:

[5] Including accounts.

[6] The CBA closing entries are included.

[7] Data are preliminary. Do not include the CBA closing entries.
