MONETARY BULLETIN

(AUGUST 2011)

The section *Monetary Overview* of the "*CBA Bulletin"* monthly of the Central Bank of Armenia contains the CBA September 6, 2011 Board Meeting's Minutes on the refinancing rate for September 2011, and information on monetary, external, fiscal and real sectors, and data on payment and settlement system and the main financial system ratios.

The source of information on *Real Sector* (excluding core inflation) and on goods' export and in *External Sector* is the National Statistics Service of Armenia (http://www.armstat.am). The source of information on fiscal, external sectors, monetary and financial statistics, core inflation and payment and settlement system is the Central Bank of Armenia. The monetary and financial statistics includes information on monetary indicators and the main financial market and financial system ratios.

Monetary indicators are based on the CBA's "*Monetary and Financial Statistics of the Republic of Armenia Manual*" which is available on the CBA website in the section *Statistics*.

The monetary indicators and international reserves of the Republic of Armenia are subject to adjustment per quarter and per annum in order for the closing entries of the CBA operations to be included in these indicators. The quarterly data and the annual data shall be adjusted (treated as final) two months after the end of the reporting quarter and three months after the end of the reporting year, respectively.

The timetable for publication of statistical data is available on the CBA website in the section *Statistics.*

BOARD OF CBA

MINUTES
(06.09.2011)

Refinancing Rate for September of 2011

The 6th of September 2011 CBA Board Meeting attended by Chairman Arthur Javadyan, and Board Members Armenak Darbinyan, Oleg Aghasyan, Aharon Chilingaryan and Vakhtang Abrahamyan

The Board Meeting started with presentation of the Situation Report. The discussion covered current developments on inflation, external environment and real, fiscal and monetary sectors. Reduced by 1.5 pp relative to the respective July indicator, the 12-month inflation in August of 2011 came back to the confidence band of 4 % $\pm$ 1.5 pp, making up 4.8 percent. Increases in prices of food products, non-food products and service tariffs have made, respectively, 3.7 pp, 0.5 pp and 0.6 pp of contribution to the 12-month inflation.

According to official statistics, in August of 2011, relative to the previous month, 0.6 percent deflation was recorded. This was totally due to 1.0 percent decrease in food prices (contribution to deflation amounted to -0.5 pp) driven by 13.6 percent and 4.9 percent fall in prices of items 'fruit' and 'vegetable and potato', respectively. The August deflation was somewhat offset by 1.5 percent and 1.2 percent increases in prices of items 'dairy products' and 'meat products', respectively, with their total contribution of 0.2 pp to inflation. The impact of non-food prices and service tariffs has been neutral.

The Economic Activity Index in August reached 7 percent; in the period January-July the EAI was estimated to be within 5 percent, determined by increased output volumes in all branches of the economy (except for **construction**). In **industry**, output volumes have grown by 12.4 percent and in **agriculture**, by 11 percent which was almost entirely attributable to 37.3 percent growth recorded in sub-branch *plant growing.* Further, the volumes in **services** and **trade** have grown by 6 percent and 3.1 percent, respectively, whereas the volumes in **construction** have reduced by 17 percent. Such reduction against the previous year was conditioned by contracted volumes of construction financed by international loans, organizations and households, which had been somehow offset by increased construction volumes owing to state budget and local budgets.

External trade turnover indicators suggest that the growth of export speeded up: in the period January-July 2011 export of goods has grown by 31.4 percent while the growth of import kept on slowing down to a reported 8.7 percent in January-July.

In the fiscal area, trends persisted as they were in the beginning of the year. This means that savings were further reported on quarterly proportions set by the Government and on the Central Bank's projections, which creates a restrictive impact on inflation environment.

The developments in financial market in August were as follows: interest rates in repo market tended to fall, so market repo rate and interbank repo rate dropped by 1.03 pp to reach 9.54 percent and by 0.79 pp to reach 9.17 percent, respectively. Also, average

market rate of treasury bills with up to 1-year of maturity fell by 0.9 pp to reach 7.79 percent.

In August of 2011, relative to the previous month, the average dram exchange rate has been as follows: AMD/USD depreciated by 0.29 percent to reach AMD 367.07; AMD/EUR depreciated by 0.56 percent and amounted to AMD 526.45; and AMD/RUB appreciated by 3.22 percent to reach AMD 12.74.

On the back of the said development in the financial market the 12-month performance of monetary indicators was as follows: the 12-month growth of dram aggregates at the end of August outpaced the growth of broad aggregates, so the growth of dram broad money was 28.6 percent fuelled by around 49 percent growth of dram deposits and 16 percent growth of currency. This growth of dram broad money and 15.2 percent increase of foreign currency deposits resulted in some 22.6 percent growth of broad money. In the outcome, in the course of 12 months the dollarization has subdued by 2.5 percent. The growth of lending by the banking sector in end-August was 37 percent. Lending in dram has increased by 24 percent.

Following presentation of the Situation Report, the Board began discussing the developments in external and domestic environments as well as the monetary policy directions.

In August world financial and commodities markets were developing in the times of deteriorating global economic growth outlooks as developed countries were still facing economic problems. Deflationary trends were seen in markets of primary goods, while relatively less risky assets and precious metals prices reported new peaks. In consideration of the developments above, the Board stated that impulses coming from external sector are now estimated to have a neutral impact on inflation, with certain probability of even deflationary risks to come through. It was further agreed that uncertainties about global economic growth outlooks due to fundamental imbalances in developed countries still remain.

The Board has consensus that impact of domestic demand on inflation is trending down: the effect of private spending is estimated to be neutral and the fiscal policy's impact restrictive. Neutral is the impact from the labor market in terms of unit labor costs.

The Board summed up that inflation developments in the last couple of months are in line with the scenario outlined in monetary policy programs of 2011, and it has reason to believe that tightened monetary conditions, restrictive nature of the fiscal policy, still reluctant private spending and increased output volumes in agriculture will promote further deceleration of the inflation rate, possibly pushing it closer to the lower border of the confidence band. The Board mentioned that at the end of September the 12-month inflation, driven by steep rise in sugar price, may come closer to, or step outside, the upper border of the confidence band, which it did not consider a concern since the 12-month inflation will be going to scale down fast in the upcoming months.

Because the environment above described is non-inflationary for the upcoming time horizon, the Board decided to loosen monetary conditions to allow inflation within confidence band in the forecast time horizon while creating extra stimuli to push up economic activity.

In the 6th of September 2011 meeting the Board lowered the Refinancing Rate to an 8.0 percent level; the Lombard Repo Rate and Deposit Facility Rate were lowered too, to 11.0 percent and 5.0 percent, respectively.

[1] Monetary base includes currency outside of the CBA, correspondent accounts of banks with the CBA (in drams and FX) and deposits of resident real sector (in drams and FX).

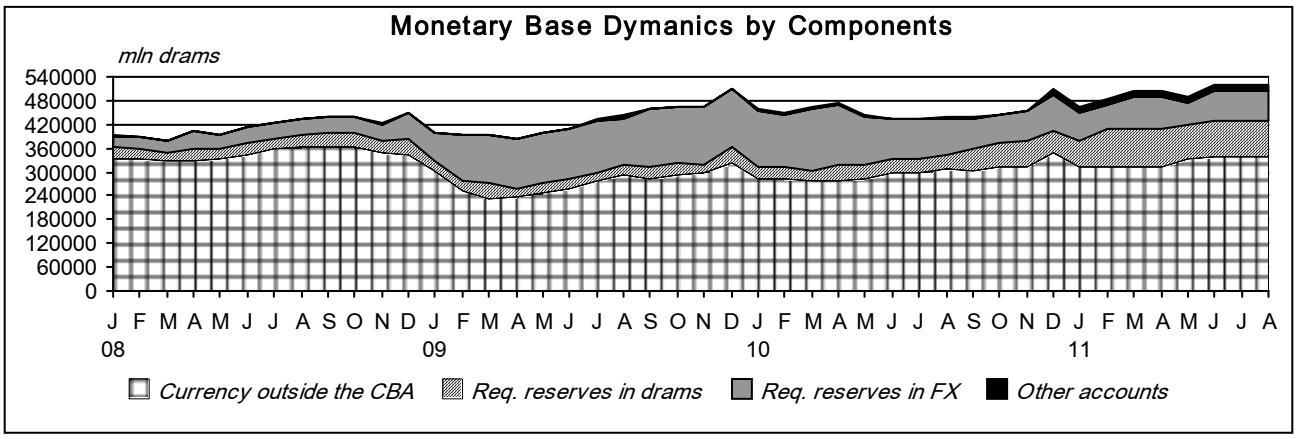

[2] M1 includes currency in circulation and residents' demand deposits (accounts including) and borrowings in drams.

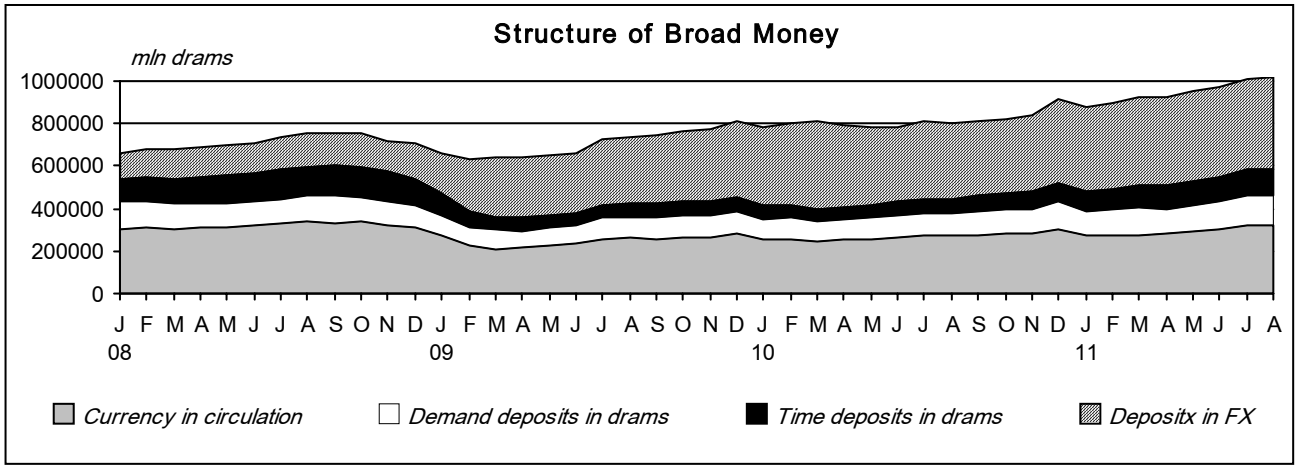

[3] M2 represents dram broad money and includes M1 and residents' term deposits and borrowings in drams.

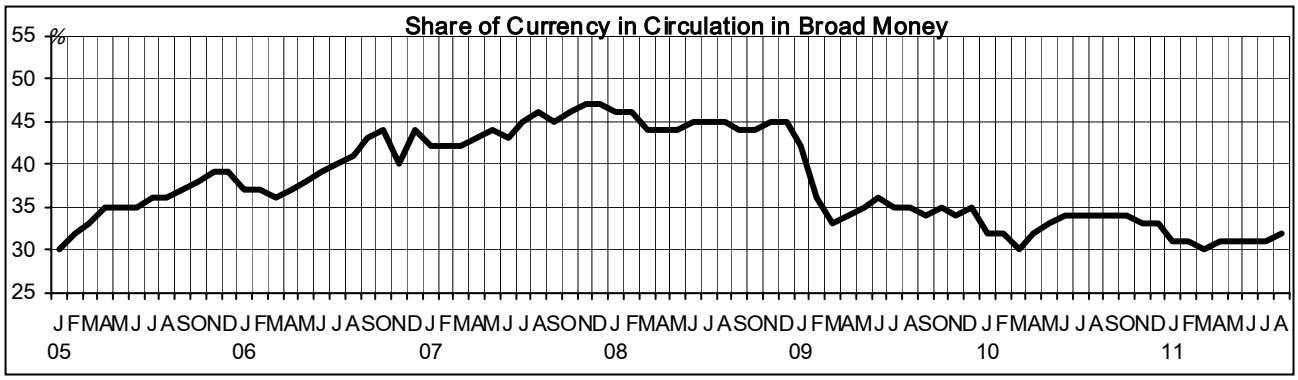

[4] M2X represents broad money and includes M2 and residents' FX deposits (accounts including) and borrowings.

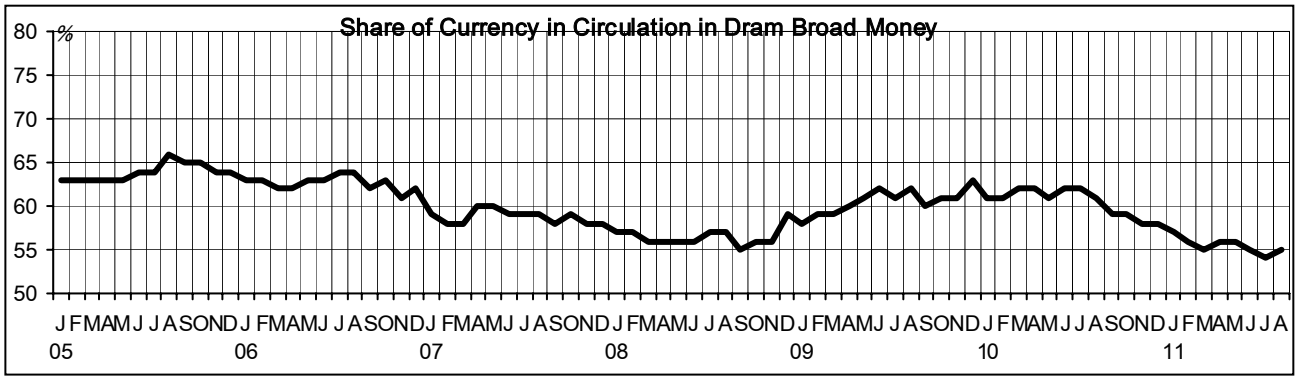

[5] Ratio of M2X to monetary base as of the end of the month.

[6] Ratio of M2 to the monetary base dram aggregates total as of the end of the month.

[1] *Monetary aggregates are netted from seasonality.*
The time series of monetary aggregates are annually revised since seasonal coefficients for relevant months change along with the new data. Thus, seasonally adjusted new monetary aggregate series are published in the first issue of each year of the monthly "CBA Bulletin".
The time series adjustment has been carried out using Census X-12-ARIMA method of adjustment.
