

SHORT DESCRIPTION

Name

Practice of Introducing International Standards for Information Security Management

Type

Seminar

Overview

Meeting high requirements of international standards is what the Central Bank of the Republic of Armenia always looks for in its activities and commercial banks' as well.

During the seminar, the Central Bank will present its approach and practice in the implementation of ISO 27001 - the international standard for information security.

Experienced information security and information technology experts will make interesting presentations. The speeches will cover practical aspects of how to organize work while the experts will share their experience in introducing this international standard. The seminar participants are expected to make presentations and exchange views on issues of information security. There will be a roundtable with the involvement of Armenia's leading audit companies which perform the audit of ISO 27001 in commercial banks.

Participants

The seminar is designed for managers of central/national banks, which are responsible for maintaining information security, conducting IT/IS audit and introducing the international standard for Information Security (ISO 27001).
